

Rome Trip Planning Competitiveness Kit

Great Price Flights v10.5 - Rome readiness score, itinerary builder, official-source ticket workflow, neighborhood decision links, hidden-fee proof plan, Search Console tuning map, and final launch checklist.

Use this kit to make the Rome Travel Planner more competitive while avoiding fabricated ticket, price, schedule, or policy claims.

1. Rome Trip Readiness Score

Factor	Why it matters
Hotel area chosen	Rome trip quality changes quickly based on walking routes, transit, and tour start locations.
Airport transfer planned	FCO/CIA arrival time, luggage, and hotel area determine transfer value.
Timed tickets checked	Colosseum, Vatican Museums, Pantheon, and other attractions may require official-source/timed-entry checks.
Daily route pacing	Rome is walking-heavy, so overstacking sights can make the trip feel rushed.
Hidden fees counted	City tax, luggage, transfers, tickets, taxis, and booking fees can affect true trip cost.
Insurance/backup plan	Nonrefundable tours, flights, hotels, and medical/evacuation exposure can change risk.

2. Itinerary Builder Paths

Trip length	Best planning path
3 nights	Prioritize Ancient Rome, historic center, one Vatican block, and minimal day trips.
4-5 nights	Add better pacing, neighborhoods, food, and flexible recovery time.
6-7 nights	Add day trip planning, deeper museums, and more local areas.
Family trip	Reduce daily walking, simplify transfers, and keep tickets flexible.
Budget trip	Prioritize area, transit, food costs, free sights, and hidden-fee buffer.

3. Official-Source Ticket Workflow

Attraction	Official-source action
Colosseum / Roman Forum / Palatine	Check the official ticketing portal and current entry/name/rule notes before recommending ticket paths.
Pantheon	Check the official culture/museum ticket source and unauthorized-reseller warnings before recommending purchase options.
Vatican Museums	Use the official Vatican Museums portal and avoid confusing similar-domain sites.
Borghese / passes / tours	Confirm official booking rules, inclusions, timed-entry requirements, and cancellation terms.

4. Proof Slots to Add Later

5. Search Console Tuning Map

Query pattern	Best page action
rome trip planner	Strengthen readiness score, itinerary builder, and quick verdict.
rome itinerary 5 days	Add 5-day route, pacing, tickets, food, and neighborhood blocks.
where to stay in rome first time	Move hotel-area links higher and connect to Rome hotel area guide.
rome airport transfer	Link transfer comparison and arrival-day planning from hero/decision sections.
rome colosseum tickets / vatican tickets	Strengthen official-source ticket workflow and proof slots.

6. Final Launch Checklist

- Readiness score works.
- Itinerary builder links to flights, hotels, transfer, tickets, insurance, hidden fees, and packing pages.
- Official-source ticket workflow avoids unsafe or fabricated claims.
- Proof placeholders remain placeholders until real screenshots are uploaded.
- PDF opens and downloads.
- Mobile layout, calculators, schema, and internal links are tested.
